Summary

Results-driven Flutter Developer with 2+ years of experience delivering ERP systems, e-commerce platforms, and workflow automation solutions. Strong expertise in Flutter, Firebase, and REST APIs, building scalable multi-platform applications across Android, iOS, Web, and Windows. Experienced in multi-role architectures, payment integrations, and real-time systems, with an emphasis on performance, clean architecture, and well-documented code.

Technical Skills

Mobile: Flutter, Dart

State Management: Provider, Riverpod, BLoC, Cubit

Architecture: Clean Architecture, MVVM, MVC, SOLID

Backend: Firebase, REST APIs

Database: Firestore, SQLite, MySQL, PostgreSQL, Supabase

Testing: Unit, Widget Testing

Integrations: Razorpay, OTP, Push Notifications, Google Maps, Deep Linking

Tools: Git, Postman, Android Studio, VS Code, Agile

Professional Experience

Flutter Developer — Euphoricoders

Jun 2025 – Present

- Engineered SaaS-based ERP and workflow systems for the construction domain
- Developed scalable multi-role applications using Flutter and REST APIs
- Automated business workflows to improve operational efficiency and reduce manual processes

Flutter Developer — First Logic Meta Lab Pvt Ltd

Jun 2023 – Jun 2025

- Developed cross-platform mobile applications across e-commerce and logistics domains
- Delivered end-to-end features including UI development, API integration, and deployment
- Designed and implemented multi-role systems with tracking and workflow automation
- Integrated payment gateways, push notifications, and location-based services
- Built scalable applications using Flutter, Firebase, and REST APIs
- Automated backend workflows using Firebase Cloud Functions
- Implemented Google Maps, deep linking, and real-time notification systems
- Wrote, tested, and deployed production-ready Flutter applications following Agile practices

Projects

CivilAcquire – ERP Application *Flutter — REST API — Razorpay*

- Built ERP platform for design, estimation, and order management workflows

- Implemented complete order lifecycle including revisions and approvals
- Integrated subscription models, wallet system, OTP authentication, and Razorpay payments
- Automated workflow processes and lead management systems
- Developed cart, checkout, GST calculation, and add-on modules
- Managed Play Store deployment, updates, and production releases

Construction Admin & DMS System *Flutter — REST API*

- Developed construction ERP system with EMI tracking, payments, and issue management
- Built field application with GPS tracking and geo-tagged data uploads
- Implemented workflow automation dashboards for operational monitoring

TharaCart Marketplace *Flutter — REST API — Firebase*

- Built multi-platform e-commerce ecosystem including mobile apps, web panel, and admin dashboard
- Developed ordering workflows, admin monitoring systems, and payment integrations
- Designed shipping lifecycle and logistics workflows
- Built role-based applications for sales, warehouse, and delivery operations
- Enabled seamless multi-role coordination across the platform

DCost – Commerce Platform *Flutter — Firebase*

- Developed customer, merchant, and admin applications for commerce operations
- Implemented product management, transactions, and order handling
- Designed location-based product discovery features

VivinoShop – Credit App *Flutter — Firebase*

- Built credit ledger system with transaction tracking and reminders
- Implemented repayment workflows and user notifications

Membership & Data Tools *Flutter*

- Developed analytics dashboard and lead tracking system
- Implemented advanced search, filtering, and Excel data import features

Nexora – Real Estate UI *Flutter*

- Designed responsive UI for real estate platform
- Built reusable UI components following clean architecture principles

Education

Bachelor of Computer Application Calicut University	2020 – 2023
Higher Secondary (Computer Science) GVHSS Cherpulassery	2018 – 2020
